

Assignment 1

Studio Exercise Portfolio

Due: 5:00 pm, Friday 9 April 2027

Weight: 40% of the final course mark

Overview

Build a portfolio from the first six weeks of studio work. The portfolio should demonstrate a progression from individual technical choices to a concise, edited visual story. The work must show a real change rather than simply document a place.

Submission	One upload folder containing four labelled exercises and one supporting PDF.
Video format	H.264 MP4, 1080p or lower. Use captions in the final sequence.
Collaboration	You may work with one collaborator, but each student submits an individual reflection.
File naming	Use your student number and a1 in each filename, for example: u1234567_a1_final.mp4.

Portfolio components

1. Framing a change

A three-shot sequence using wide, medium and close shots.

2. Light study

The same subject recorded in two contrasting lighting conditions, with a 100-word comparison.

3. Sound portrait

A 30-second sequence led by ambient sound or clear voice.

4. A small change

A 60-90 second non-fiction video with a recognisable beginning and ending. Use purposeful sound and captions.

Submission checklist

1. Four labelled exercise videos are included.
2. Each video is an H.264 MP4 at 1080p or lower.
3. The final sequence is 60-90 seconds, captioned and shows a real change.
4. A single PDF includes a contents list, the light-study comparison, a final-sequence logline and shot list, a 250-word reflection, and a media/consent record.
5. All participants and any external media are acknowledged in the production record.
6. Every file follows the required student-number and a1 naming pattern.

Technical and ethical requirements

Record only people and locations you can approach responsibly. Obtain permission before filming participants, and keep a record of their consent. Where you use external media, name the source and describe the permission or licence that allows its use.

Use the supporting PDF to make your decisions traceable. The assessor should be able to connect the final sequence to your plan, footage choices and reflection.

Marking criteria

Criterion	Weight
Exercise completion and development	25%
Image, light and sound choices	30%
Editing and technical care	25%
Reflection, consent and media record	20%

Feedback

You will receive rubric feedback in the course site. Use it to identify one craft priority for the final project.
