

Final Project

A Short Visual Story

Due: 12:00 pm, Friday 28 May 2027

Weight: 60% of the final course mark

Overview

Create a 2-3 minute short film about a person, place, process or question that you can approach responsibly. The work may be observational, interview-led, essayistic or process-based. It needs a specific viewing experience and a deliberate point of view; it must not become a promotional video.

Scope the project so that you can shoot, edit and revise it during the semester. A finished small story is stronger than an unfinished large one.

Submission	One captioned film file plus one 3-5 page PDF production dossier.
Video format	H.264 MP4, 1080p or lower, 2-3 minutes long.
Dossier	A clear record of planning, feedback, permissions and any external media.
File naming	Use your student number and final in each filename, for example: u1234567_final.mp4.

Milestones

Week 8	Bring a one-sentence premise.
Week 10	Bring a 90-second to 3-minute rough cut.
Week 11	Bring a revised cut, captions and a draft dossier for peer review.

Deliverables

Submit both items together in the course site.

1. Captioned short film

The MP4 should work as a self-contained viewing experience. Use a clear point of view and a formal approach that suits the story. Check picture, sound, captions and export on the device you will use for submission.

2. Production dossier

The 3-5 page PDF dossier must contain:

1. Logline and audience statement
2. Storyboard or edit map
3. Production log
4. Two feedback changes and why you made them
5. Consent and media record
6. 400-word critical reflection

Final checks

Name all participants and external media in the dossier. Confirm consent before publication or submission. Keep project files, source media and the final export in more than one location until results are released.

Marking criteria

Criterion	Weight
Story, structure and audience	30%
Cinematography and sound	25%
Editing and revision	25%
Dossier, ethics and attribution	20%

Submission standard

The assessor must be able to view the MP4, read the captions and trace the film's creative and ethical decisions through the dossier. Test the submitted files before the due time.
